- The App (iOS und Android) can be customized and extended

Multifunctional

Direct product selection

Smarpay

smarpay App

## Application areas

The smarpay app can be used wherever the simple payment of small amounts is required. The app can be downloaded free of charge and used immediately without registration for direct, spontaneous payment. All common payment methods (country-specific and international) are supported. After a simple registration, identification via SMS is sufficient, the app can be used for further functions, such as the integrated wallet and topping up cards (e.g. Legic). In addition, various loyalty functions, such as a points system, are offered. Further additional functions and customer-specific extensions are possible. Currently, the app supports coffee machines, vending, parking and laundries.
